

MEDIUM TERM CRYPTO REPORTS

SMALL CAP BIG GAINS

SAMPLE REPORT #210

S a t u r d a y , 6 A u g u s t 2 0 2 2

Expect 2 to 3 PDF Reports per week or as the market dictates.

Reports are delivered quickly, (or as the market dictates) and you get notified immediately via the Private Subscription Telegram Channel when a new report is available. For any further updates such as Questions & Answers, we provide a weekly LIVE Q&A on Wednesdays. See this report and your members' login area at BitcoinTAF.com for Zoom Webinar access information.

- MTT trades are best used for 7 to 45 days whereas new reports are nonstop provided.
- Profit and/or gains could easily be transferred into your Foundation Coins or re-traded over and over within 7-45 days.
- The recommended rule is to trade between 5 and 10 coins at any given time, and roll profits over continuously.
- Medium Term Trades are different from Long Term Trade Reports where trades are normally between 3 and 6 months.
- Always download, read and use the latest report, data can change quickly.
- We analyze faster-moving cryptocurrencies that have the potential to outperform Bitcoin and other cryptocurrencies.
- Extra crypto trades (coin picks) may be posted on the Private Telegram Channel. We may also post updates consisting of major news events, and ready-to-move coins, indicating entry and exit points in an easy-to-read chart format.
- Interactive weekly private Zoom calls are recorded, including Q&A for subscribers.
- Weekly PDF Reports consisting of the top MTT Cryptocurrencies we follow, with clear entry, buy and sell targets.
- Data is easy to understand, and simple while entry and exit points are clearly explained.

Medium Term Trade Report (MTT) Update – PDF Report #209

Friday, 5 August 2022 – Private Bitcoin & Cryptocurrency Index by Inus de Bruin

BITCOIN IS CLOSE TO A PIVOTAL MOVE!

Bitcoin continues to make higher highs which are bullish in the current environment we are trading in. In the first instance the price needs to break above the previous high of \$24,668 for continued momentum and this would indicate a strong trend reversal to bring the higher targets into play towards \$28,188.

Bitcoin is still consolidating within a range to build some structure and the best strategy is to DCA on dips. Only IF we confirm a break below \$20,900 (price for this week) we could see lower targets towards the \$16,200 to \$17,000 range. For now, it's off the table.

We are coming closer to our pivotal dates for the 8th of August towards the potential low point on the 12th of August (given a day or two) whereas I do see more upside coming for August after those time points.

Expect sideways chop for the time being, especially over the weekend with mostly retailer traders in the market.

Bitcoin is still consolidating above the 200-week moving average which is very significant in the short term holding onto the recent momentum and gains seen over the last few weeks.

This is a quick summary report that we are still on track and want to look at three different altcoins in today's report.

We will discuss the full report on Monday / Tuesday with updated entry/exit levels.

REMEMBER: Nothing will go up in one straight line. We will have time to ladder into positions to take the best advantage of trades to make incredible gains within the next upcycle and between our target trading days being 7 to 45 days, we then take the profit and roll these into new trades.

Upcoming dates we need to keep an eye on for August:

- 3rd of August (Expect Volatility)
- 8th - 12th of August (Possible LOW point)
- 22 August
- 29 August

We are looking for your testimonial or review for the newly released MTT Crypto Reports, if you could be so kind to write a review on our product page: BitcoinTAF.com (Must be logged in, to write a review).

We are continuing to improve our report to bring you the latest and best information in the crypto market. MTT now have its own uniquely developed algorithm known as the MTT Historical Gold Oscillator (**MHGO**) to predict market analysis where we will have an added advantage for you, the subscriber of Medium-Term Trade Reports.

We will continue to bring the MTT community the latest updated information.

The DXY is consolidating below the breakdown level of 106 points, however still showing some strength in holding this level after the break with the retest. Important time coming up next week as we move into the 2nd week of August with the time pivots. We still require confirmation and trade below the blue upwards trendline at 105.483 points (currently).

ONCHAIN ANALYSIS

"The implied pressure on Long-Term Holders' hands has reduced slightly as spot prices trade above their average cost basis (of held coins). However, despite the decreased financial pressure, LTHs continue to spend coins at a net loss, locking in between -11% and -61% on average."

"A meaningful proportion of selling pressure appears to still be coming from Long-Term Holders, particularly those who accumulated their coins near the market top in 2021-2022. The recent rally has given allowed Long-Term Holders an opportunity to exit a fraction of their holdings at their cost basis, at prices which essentially 'get their money back'". (Source: glassnode)

Chart Analysis

1. Bitcoin GBTC Value Indicator (MHGO)

Private & Confidential

No change in the MHGO. The algorithm is still pointing towards higher prices for August.

The MHGO is expecting a positive break in Bitcoin and alts for August. The expected 1-2-3-4-5 Elliott Wave upcycle has played out until the 18th of July 2022. Dates are approximate to provide MTT members with a guideline as to what could be expected over a 7 to 45-day time-lapse. In terms of the historical MHGO cycle, we are now heading towards our "b" cycle upwards after a sideways consolidation.

Notice from the previous report: "From 12 July to 18 July, the MHGO indicates a strong move for ALT coins in general, especially the coins mentioned in this report." We do see the momentum continuing into August to take advantage of this cycle.

**Support Team:****TERMINOLOGY****Limit Exposure or exit points**

- The term limit exposure means a trader could exit with 10%, 20%, or 30% depending on the setup of the trader.
- The trader then sells higher and buys in lower.
- By law we cannot give financial advice, cannot tell you when to buy or sell, nor can we entice you to buy or sell. Use this report as a guideline for training and education purposes.

Trading cryptocurrencies - training & education only, not financial advice:

- An investor could hold positions and/or add to positions on pullbacks but trade with a STOP LOSS
- If markets keep going higher, re-enter positions upon a break upwards following the 55% rule breakout.
- The 55% trade rule can be found here: <https://www.youtube.com/watch?v=yus1iYVwKTI>
- All coins are expected to follow different price movements at different date cycles and not all coins will move at the same time.
